bodyswaps

Learning Pathways Showcase Highlights + Q&A

Introduction & Demo

- Chris (Bodyswaps) introduced Learning Pathways, a feature developed in response to educator feedback requesting customisable, bite-sized learning units.
- The session outlined how pathways combine guided learning, AI roleplays, and assessment tools to create structured soft skills programs.
- Liz (Bodyswaps) provided an overview of public, off-the-shelf pathways.

Mary Lee Carter, Parker University

Mary Lee shared how Parker University has embedded Bodyswaps into multiple programs since 2022, with institution-wide access.

Example use cases shared included job interview practice for sonography students as well as mental-health crisis simulations and geriatrics pathways for Doctor of Chiropractic students.

Mary Lee mentioned some notable Pathways functionality benefits for their deployments, such as pre-briefings with mental health resources, survey disclaimers and informed consent capture as well as concluding quizzes.

Future plans include developing a virtual AI-powered OSCE pathway.

Liz Leggott, South Yorkshire Primary Care Workforce & Training Hub

Liz described how the Hub adopted Bodyswaps to expand access, capacity, and quality of soft skills training - particularly for international medical graduates.

Implementation Model: Cohorts of 40-45 trainees with split delivery.

Liz described their approach to Pathways as a "supermarket shelf" model, combining:
- Existing Bodyswaps modules
- Custom AI roleplays
- Knowledge checks and evaluation with quizzes

Demo

The live demonstration showed how to build a pathway from scratch:
- Create a free-form reflective questionnaire
- Add learning units such as *Finding Your Voice* and *Grounding Yourself*
- Insert an AI roleplay (demo was using the "Debating" template)

Question: Are the bite sized activities reconfigured content from the modules 'unscaffolded'?

Answer: Yes. We segmented the activities from all our scripted modules into individual, bite-sized activities. They have been extracted pretty much exactly as they are in the modules, with some small adjustments to character lines or pop ups where needed to allow them to stand separate from a larger experience.

Question: Is there a list somewhere we can have with each of the avatars personalities.

Answer: To answer generally, the avatars don't have individual pre-set personalities -- that is all controlled by the customisation, though they do have some very light touch direction where relevant to the roleplay e.g. in active listening healthcare the AI character is told they are in a healthcare sim, and to adopt the specific role that will be described to them.

Please do let us know if you need help with prompting, we can advise on what might help get around these LLM-like tendencies to be overly friendly.

Question: Do you collaborate with institutions to create specialised content?

Answer: Many of our modules were made in partnership with big name institutions or highly experienced SMEs. If you're interested in exploring a partnership, please contact hello@bodyswaps.co

Question: Are there any plans to add to Customer Service content?

Answer: We're continually exploring new content - please feel free to share specific requests at any time using this form to help us prioritise our content roadmap.
